

## Install sklearn

1. Enter the Anaconda Prompt, as seen in the lecture and write:

```
pip install matplotlib
```

or

```
conda install matplotlib
```

*matplotlib should be shortly installed*

2. Enter the Anaconda Prompt, as seen in the lecture and write:

```
pip install pandas
```

or

```
conda install pandas
```

*You should receive a message that pandas is already installed (it comes with Anaconda, remember?)*
