

## SOLUTION – Changing Column Order in Pandas DataFrame

```
df_concatenated.columns.values
column_names = ['Reason for Absence', 'Date', 'Transportation Expense',
                'Distance to Work', 'Daily Work Load Average', 'Body Mass Index',
                'Education', 'Children', 'Pets', 27,
                28, 29, 30, 31, 32, 33, 34, 36, 37, 38, 39, 40, 41, 43, 46, 47, 48,
                49, 50, 58, 'Absenteeism Time in Hours']
df_concatenated.columns = column_names
df_concatenated
```
